

ZEDcon

ZEDcon is the standard adapter series to connect devices from the ZED family to the test item. The ergonomic adapters are also developed and manufactured by ZELTWANGER. This means that – in addition to the standard adapters – special solutions can be implemented quickly and economically.

Advantages:

- + Turnkey system provider for your leak tests
- + Technical advice / feasibility, adaptation and test device, commissioning, service
- + In-house development and production
- + Technical design and consulting

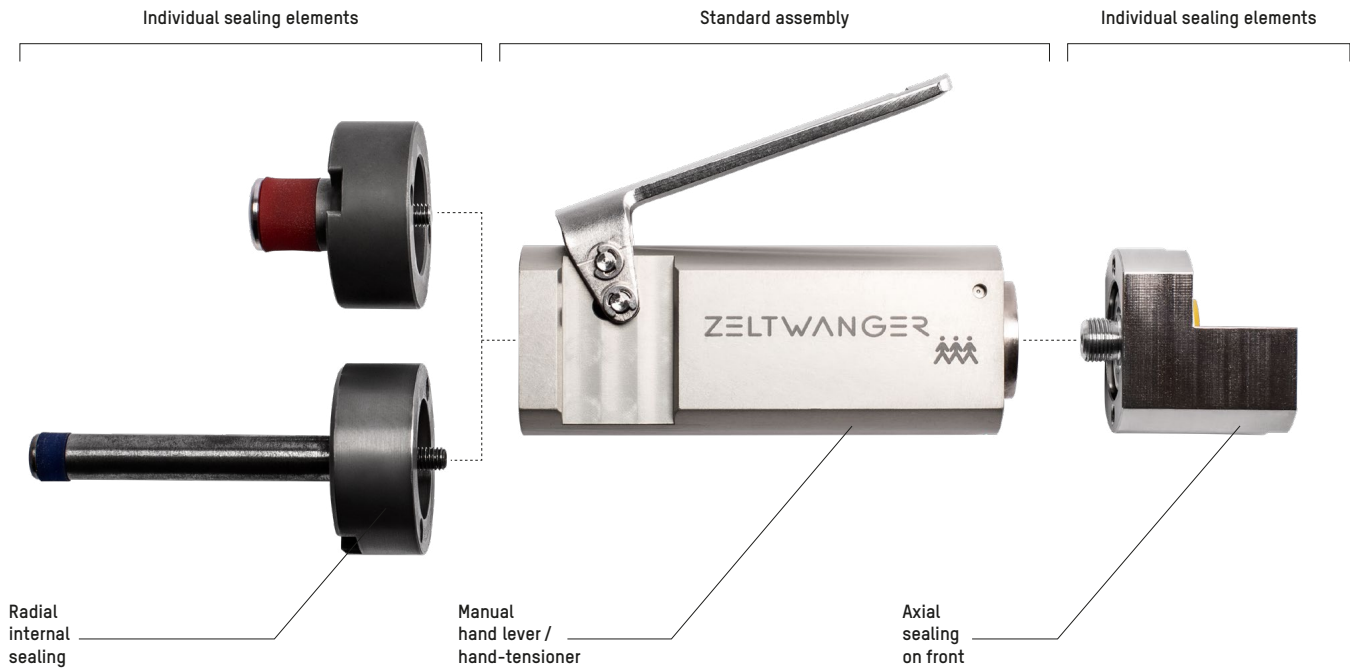

E-mobility application examples:

- **Battery:** Battery housing, cooling circuit of the battery, pressure compensation elements, electrical connections (e.g., signal or COM plug), ...
- **Electric machinery:** Inverter room, drying room, if necessary oil room, electrical connections, and plug connectors

Accessories:

- Master parts carriage
- Customer-specific adaptation

Exemplary illustration of a hand-tensioner with selected customer-specific sealing elements

Product features:

- Manual operation
- Easy to use
- Robust Al housing / high-quality materials
- Striking look for easy identification on the test item
- Ergonomic design
- Easy seal change
- Standardized basic structure and application-specific adaptation
- Long service life
- Short delivery times

Operating modes:

- Manual (hand lever / tension lever)
- Automation possible

Connection type:

- + Application-specific contours external / internal sealing
- + Radial external / internal sealing
- + Axial sealing on front

Applications:

- + Measuring
- + Sealing
- + Filling

Compatible with all devices of the ZED family
