

Great response at Motek and Fakuma

Leak testing and automation: ZELTWANGER's range of services received an excellent response from the expert audience.

(Tübingen, 10/31/18) Two major trade fairs in one month: With Motek 2018 in Stuttgart and Fakuma 2018 in Friedrichshafen, there was a lot going on for Zeltwanger in October – and it paid off: Everyone across the board was very satisfied with how the two major trade fairs went. “We are delighted to have made numerous new contacts in the e-mobility sector. Lots of visitors also came to us with specific projects in mind,” said Martin Wagner, Sales Manager of ZELTWANGER Automation. 34,725 industry visitors from 81 nations plus 974 exhibitors from 25 countries – the international trade fair for production and assembly automation Motek was a resounding success. The event organizer’s assessment of the fair was: “The highest technological standard and top-quality industry visitors created an outstanding atmosphere.”

Most importantly, Motek once again demonstrated that industrial production is becoming increasingly digital: Big data, artificial intelligence, and the Internet of Things are already a reality in many technology companies. If you miss the connection now, you will soon be overtaken by others. “Continuous automation of assembly and production processes is becoming increasingly important,” said trade fair organizer, entrepreneur Bettina Schall.

With reliable solutions for every process requirement at any level of automation, ZELTWANGER hits the right note

with its holistic approach that is unparalleled in the industry. As well as its high-end leak testing devices, the company also stands out due to its comprehensive solutions in the areas of analysis, adaptation, partial automation, service, and knowledge transfer – an all-round carefree package. “This sparked great interest in our stand and led to some interesting discussions,” said Steffen Nabholz, Sales Manager at Zeltwanger Dichtheitsprüfung.

The international trade fair for plastics processing Fakuma was also a complete success for ZELTWANGER. 1,933 market and technology leaders from 40 nations, 47,650 industry visitors from all over the world – anyone who’s anyone in the world of plastics was in attendance at the 26th Fakuma trade fair. No question about it: The industry is booming. But not only is the demand for plastics increasing, but so is the need for high-quality materials and processing.

As the expert in the field of leak testing, ZELTWANGER impressed with the innovative and field-tested ZED device family. “Seamless quality assurance is the be-all and end-all in plastics processing. Our flexible ZED solutions guarantee high process reliability and can be easily integrated into existing production processes. This enables us to offer reliable quality assurance in every production step,” said Nabholz.

ZELTWANGER Holding GmbH

Technology and quality leader

The Zeltwanger Group has established a well-respected position in the market with its modular assembly and testing systems, which can be constructed individually and flexibly. The main focus is on manually linked “one-piece flow” line concepts and ergonomic single-position systems. In addition, fully automated part carrier and robot-based assembly systems meet customer-specific requirements. The range includes leak testing systems, modular assembly systems, pin assembly systems, and polishing systems for ceramic substrate. For use in the medical and biotechnological field, systems are created in accordance with European and American standards and the “Good Manufacturing Practice” guidelines.
