

ZELTWANGER presents its complete system for leak and functional testing at Control 2018

HEADING TOWARDS THE FUTURE WITH CERTAINTY

Stuttgart/Dußlingen. From mechanical and mechatronic measuring and testing devices to electronically CNC-controlled coordinate measuring systems or automated analysis equipment – quality assurance to Industry 4.0 standard is coming to Stuttgart with the Control trade fair from April 24 to 27, 2018. 900 manufacturers and exhibitors of quality

assurance equipment are presenting the current global offering of usable technologies, procedures, and products for industrial quality assurance. Leading the world in global QA: The Tübingen-based company ZELTWANGER.

Whether it's e-mobility, automotive, medical technology, the packaging industry, or general industry – seamless quality assurance for components and assembled modules as part of the production process is essential for all sectors. The Tübingen-based

company ZELTWANGER is a technology and innovation leader and is presenting its holistic approach to leak and functional testing at the Control trade fair. Holistic means: For successful leak and functional testing, ZELTWANGER not only offers the equipment you need, but a perfectly coordinated overall system in the form of comprehensive solutions for analysis, adaptation, automation, service, and knowledge transfer.

Excellently positioned with holistic solutions

A large device family for all testing tasks, in-house design, production, and software development, absolute delivery reliability, calibration services, and fast and competent customer service – at this trade fair, ZELTWANGER is demonstrating how successful quality assurance works. With the “ZED” family, the company is introducing an extremely adaptable line of devices. Whether it is a small measuring unit or a complete semi-

automated station – the flexible solutions are reliable and can be easily implemented in existing production processes. Thanks to our own software development, individual adjustments can also be made on request.

ZELTWANGER continues its holistic approach when it comes to adaptation and automation. At Control, the company is showcasing a broad process spectrum and a wide range of automation levels. The Tübingen-based company always has the full spectrum of expertise covered: Design and manufacture, individual adaptations, manual test concepts, or fully automated leak testing systems.

Everything in a single cell

With the X-CELL, ZELTWANGER is offering a solution that perfectly combines leak testing and automation expertise: The standardized robot-based machining cell is designed for core processes, such as leak testing, laser welding, laser marking, or handling, and is easy to expand for additional tasks.

ZELTWANGER will demonstrate how holistic leak and functional testing leads to sustainable success at stand 4434 in hall 4.
