

PRESS RELEASE

The ZELTWANGER Group is making long-term plans for the future

ZELTWANGER is resolutely continuing its positive growth trajectory and setting a firm course for the future. Dr. Rüdiger Brockmann has joined the management team to bolster the Group's technology and sales areas of responsibility. Furthermore, three new companies were established on January 1, 2021 to enable ZELTWANGER to better capitalize on its opportunities for growth in the relevant markets.

Tübingen (Germany), January 14, 2021 +++ As part of its transformation process, ZELTWANGER is taking decisive steps and broadening the scope of its senior management. Dr. Rüdiger Brockmann joined ZELTWANGER's management team on January 1, 2021. He is responsible for the fields of technology and sales across the entire corporate group.

“In Dr. Brockmann, we are delighted to have a renowned expert join our ranks. He has extensive experience and expertise in the automotive sector as well as in laser technology, and will play a key role in our further development. His work will focus on making the best possible use of the synergies within the ZELTWANGER Group in the fields of technology and sales as well as in relation to industry and product management. Thanks to its innovative products and solutions, ZELTWANGER is presented with huge opportunities for the future and it is vital that we seize them together,” states Managing Director Ulrich Zeltwanger.

Dr. Rüdiger Brockmann studied laser application technology at Münster University of Applied Sciences and mechanical engineering at Chemnitz University of Technology where he received a PhD. He previously worked in the technology development department of Volkswagen AG and moved to the TRUMPF Group in 2006. His most recent role there was as Director of Industry & Global Key Account Management, Product Management & Marketing in the laser technology business division.

With the aim of better meeting the needs of customers in the various markets and making the best possible use of the huge potential they offer, ZELTWANGER also established three new companies on January 1, 2021. Until the end of 2020, these were independent product areas within the corporate group; however, the increasing relevance of these areas prompted a restructuring process to take place at the beginning of this year.

ZELTWANGER Thermomanagement GmbH & Co. KG will concentrate on the development and production of systems for thermal management, such as heat exchangers. ZELTWANGER Laser Robotic Applications GmbH & Co. KG, meanwhile, will specialize in innovative laser and automation solutions. And ZELTWANGER Montage- und Prüfanlagen GmbH & Co. KG will focus on the design and manufacture of standardized automation platforms for fuel cell technology in particular.

About the ZELTWANGER Group

Since it was founded in 1982, the ZELTWANGER Group has established a prominent position in the market. The Group's success has always been characterized by an irrepressible passion for technology. ZELTWANGER stands for skill, innovation, and technical solutions to the highest standard. In the fields of automation, leak testing, and contract manufacturing, ZELTWANGER is now a technology and innovation leader. Whether for mechanical engineering, the automotive sector, e-

mobility, medical technology, packaging, or plastics technology – ZELTWANGER’s solutions are setting standards across an exceptionally wide range of industries. Passion for technology – this is what drives over 450 employees at 5 locations worldwide.
