

## X-LOAD <sup>eco</sup>

With our X-LOAD eco you receive a compact, simple and economic system for automated loading of your CNC machine tool. Whether you turn, mill or grind, the X-LOAD eco can maximize your manufacturing capacities with the touch of a button.

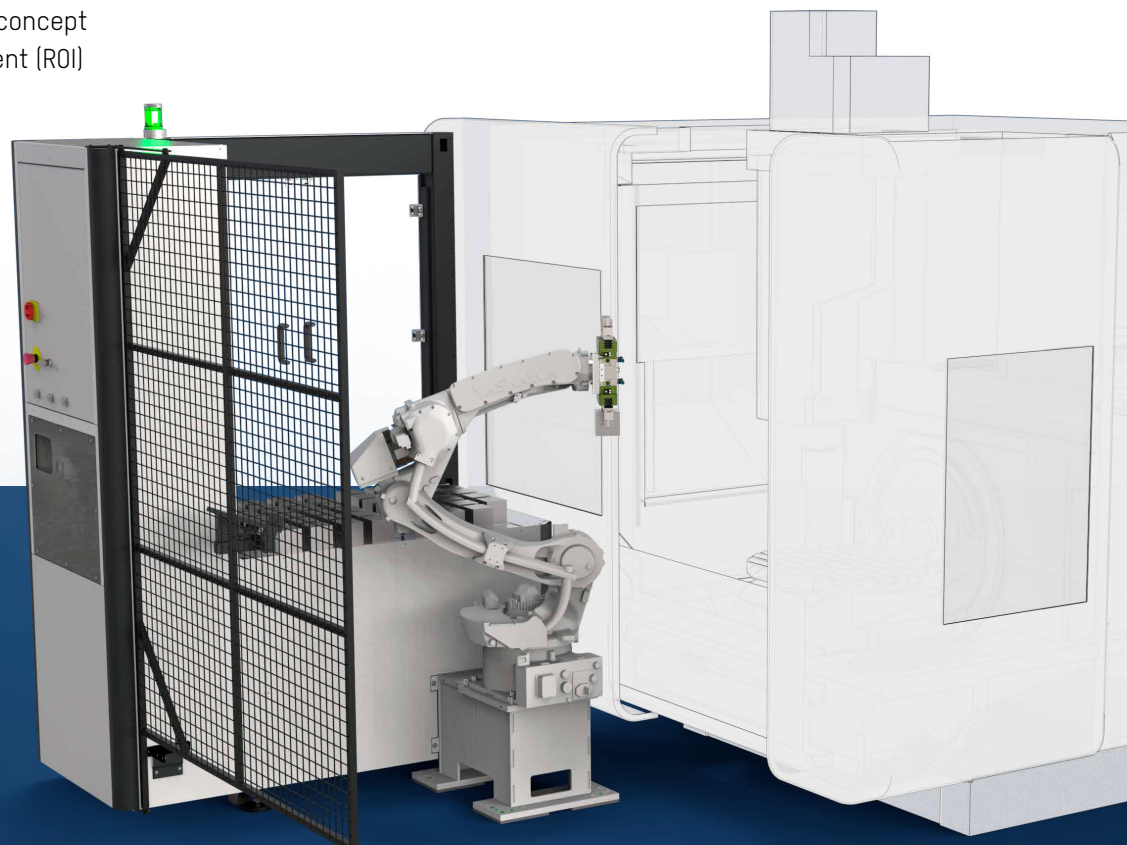

Due to the intuitive control system, programming knowledge is not necessary for operation. The X-LOAD eco can be adjusted to changing requirements by means of its modular design.

### INDUSTRIES

- + Machine Construction
- + Automotive
- + Medical Technology
- + Contract Manufacturing
- + and more ...

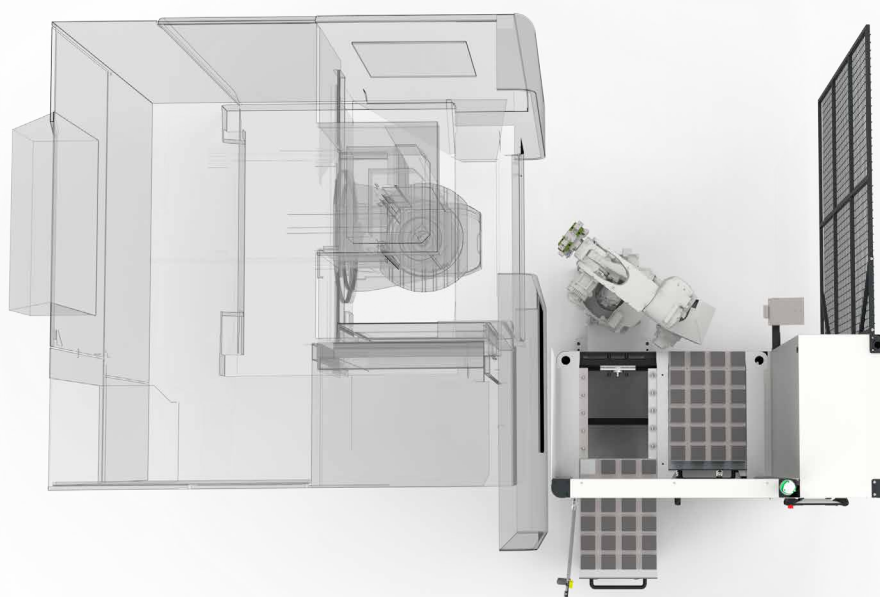

### BENEFITS

- + Compatible to almost every machine tool
- + Economic starter package
- + Accessibility of machine not restricted
- + Available with carts for heavy parts
- + Expandable
- + Innovative programming concept
- + Quick Return on Investment (ROI)

## SPECIFICATIONS

Field of application	Turning, milling and grinding machine
Dimensions	1700 x 800 x 2300 mm / approx. 67 x 32 x 91"
Maximum part dimensions (rectangular)	300 x 300 x 300 mm / approx. 12 x 12 x 12"
Maximum part dimensions (cylindrical)	∅ 250 x 250 mm / approx. ∅ 10 x 10"
Robot payload	Up to 90 kg / approx. 200 lbs
Loading options	Through the front door / through the automation preparation (side door, window, etc.)
User Interface	High quality 10.1" touch-panel for intuitive handling
